SKILLS

- Adobe Illustrator
- Adobe Photoshop
- Adobe Animate
- Scratch
- Roblox Studio
- Source Film Maker

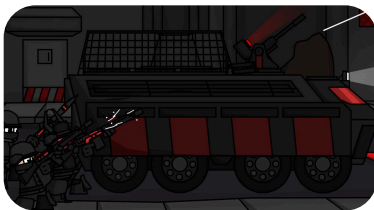

EXPERIENCE

Game Asset Contributor on Solar Conquest II

Roblox (2024 – Present)

- I have developed multiple 3D models for the Roblox game title "Solar Conquest 2," including the Mobility Suit, the Anti-Aircraft Vehicle, and various turrets.
- These assets are currently integrated and functional within the game, with several additional models scheduled for future implementation.
- I achieved this by creating multiple prototype models.
- During its peak, Solar Conquest maintained an average player base of approximately two hundred to three hundred active users.

Student Choice Project at 10th Grade

Abraham Lincoln High School (2025 – 2026)

- One school project that I am proud of is my student choice project.
- It's an animation and I received a lot of positive feedback from my teacher and my classmates. They liked how the animation was smooth and the art direction.

Assets for scenes and animations

Roblox (2024 – Present)

- Since August 2025, I have been making 3D models in Roblox for personal use.
- I have recently released 12 models to the public and they are used for scenes and animations.
- I am constantly adding new models as I make them. These models include vehicles, helicopters, and planes.

Volunteering at SF-Marín Food Bank

- I have volunteered in sfmfoodbank.org with my parents three times, in 2023, 2024, and 2025 packaging food supplies for the 53,000 households that are receiving supplies weekly.
